"Grain Forum" Is New Friday Radio Feature

Friday, December 6th, at 9 p.m., Central standard time and 8 p.m. Mountain standard time will mark the opening of a new all-Western program, known as "The Grain Forum" which will be broadcast over a net work of Western stations every Friday at the same hour. It is sponsored jointly by the Winnipeg Grain Exchange and the North-West Grain Dealers' Association and promises to contain several interesting features.

Tuneful music will be provided by a string orchestra, known as the "Cereal Strings" and, on occasions, by a specially selected group of male singers.

Short, interesting addresses of not more than ten minutes duration will deal with various aspects of the production, distribution and marketing of grain.

An invitation will also be extended to all those interested in the growing of grain to submit questions on agricultural problems, all of which will be answered. The more important questions and answers will be broadcast.

The first talk on Dec. 6 will be introductory to the series and will contain announcements of particular interest to the farming community.

On Dec. 13 a short talk on the "World's Foodstuffs and the Place Occupied by Wheat" will be given and Dec. 20th will be devoted to a special Christmas broadcast, featuring the orchestra and the male voice ensemble.

Other talks planned for early delivery are: "Canada and her Competitors"; "The Service of the Grain Elevator"; "The Grain Exchange; what it does and what it does not do"; "The factors that govern and influence the price of wheat."

Announcements will be made from time to time of other subjects to be discussed.

Christie-Brown

A wedding of interest to many took place in Yarmouth on Thursday Nov. 28, at the home of Mr. and Mrs. Brown when their second daughter, Doris Ellen, was united in marriage to John David Christie, eldest son of the late John Christie and Mrs. Christie of Mossleigh.

Rev. E. G. Hansell of Vulcan performed the ceremony. The bride looked lovely in a blue crepe dress and a short veil reaching to her shoulder. Mr. George Christie was best man and Miss Viola Brown was bridesmaid, dressed in pink tulle. After a short honeymoon in Calgary Mr. and Mrs. Christie will reside on a farm near Champion. The brides travelling suit was a blue tweed with accessories to match. They have the best wishes of all who know them.

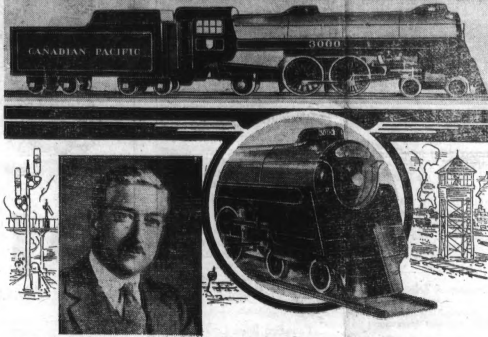

Miss Nellie Christie of the Calgary Normal School was home for the week-end to attend the wedding of her brother.

Turkey Supper

The Ladies' Aid of the Brethren Church invite everyone to their annual supper and bazaar to be held in the church basement, Saturday, Dec. 7th, commencing at 8 p.m.

Supper prices: Adults 40c; children 25c.

Canada To Have Streamline Locomotives

Marking the peak of engine development in the fifty years since the driving of the last spike at Crêteville, the Canadian Pacific Railway has under construction five light-weight locomotives, which are being built to attain a speed of 110 miles per hour. Streamlining and an increased ratio of power to weight and fuel consumption are their outstanding characteristics. Many of the ideas incorporated in these engines are quite new, having been originated by Canadian Pacific engineers under the supervision of H. B. Bowen, Chief of Motive Power and Rolling Stock. In addition, the Company's engineers closely watched experiments made by leading railroads of other countries, and have adapted and developed the best features brought out. The new Canadian Pacific engines mark a long step forward in locomotive construction.

The first five engines will be used to improve the Company's passenger service between Montreal and Quebec, and will haul at high speeds trains of new light-weight coaches now being built for the service. They are of 4-4-4 type, with a total engine and tender weight of 430,000 lbs., or about 33 per cent lighter than engines now running, and designed to do the same relative work. This means a consequent

important saving in fuel, water and maintenance. The boilers are of nickel steel designed to stand a pressure of 300 lbs. per square inch, and fittings and appliances are all of the latest type, including super-heaters, feed water heaters, mechanical stokers, roller bearings and tandem connecting rods. They are coal burning, the tenders having a capacity of twelve tons. The tractive effort will be 25,000 lbs., cylinders 15 1/2 by 28 inches, with the drivers having a diameter of 80 inches. Photographs of the model give a comprehensive idea of the new engines. Last H. B. Bowen, Chief of Motive Power, Canadian Pacific Railway.

Marking the peak of engine development in the fifty years since the driving of the last spike at Crêteville, the Canadian Pacific Railway has under construction five light-weight locomotives, which are being built to attain a speed of 110 miles per hour. Streamlining and an increased ratio of power to weight and fuel consumption are their outstanding characteristics. MILO NOTES

Mrs. A. Leverette who has been under the care of Dr. Scott of Bassano, went through an appendicitis operation last week.

Miss Ruth Northcott returned last week from Calgary for a visit with her parents and friends.

Mrs. H. Peterson is moving into Calgary for the winter season.

Norse Bertrand, son of Mr. and Mrs. V. J. Bertrand, was another victim of appendicitis last week.

Miss Edy the Lockwood held a very successful dance at the Eastway school on Friday last.

The two oldest children of R. E. Peterson are latest victims of the mumps.

OBITUARY

Scott Reid

Scott Reid, 67 years of age, well-known farmer of Blackie, Arrowwood and Okotoks districts prior to moving to Calgary a year ago, died Saturday afternoon at his home, 305 Eleventh Ave. East. Born in Centerville, N.H., the late Mr. Reid is survived by his wife Nora, and a sister, Mrs. A. Hayden, of Centerville.

Funeral services were conducted by Rev. M. L. Burget on Wednesday morning at the Park Memorial Chapel.

U.F.W.A. Notes

The next meeting will be in the form of a Christmas party on December 11th, at the home of Mrs. J. S. Culp. Sunshine friends will exchange gifts. A covered dish luncheon will be served promptly at 1 p.m. All members and friends cordially invited.

BUFFALO HILL NOTES

Mr. and Mrs. James Watt were Lomond visitors over the week-end.

The Buffalo School District has a new outcutter in Walter Steiner who has lately purchased the half section formerly owned by Geo. Brown.

Hirst Goltshorpe has just finished cutting feed for Mrs. McInenly with the Hammer Mill.

Mr. Jas. Douglas has bought a new Massey Harris Hammer Mill and is prepared to cut feed for anyone wishing him to do so.

Mrs. Frank Tharlie was a visitor to Calgary over the week-end.

Mr. Bowden Ingraham has purchased a new Dodge Car. We have not decided on the make of car we intend to get at present.

QUEENSTOWN ITEMS

Mrs. White was a visitor to Calgary a few days this week.

The Queenstown Old Time dance was well attended. Every one seemed to have a good time. Supper was served by the W. I. members.

Mr. and Mrs. L. Jeffers of Gleichen attended the Old Time Dance on Friday.

Don't forget the W.I. Bridge in Nordf's store Thursday Dec. 6.

READ THE "RESOURCE"

SHOULDICE NOTES

About one hundred and fifty people from the districts of Shouldice, Queenstown and Majorville attended a reception in honor of Mr. and Mrs. J. Taylor in the Shouldice hall on Wed. Nov. 29. The earlier part of the evening was spent in playing cards. Mrs. H. Watwood taking ladies first prize and W. Osler gets. This was followed by dancing to the music supplied by Mr. and Mrs. Tomlin and George Rottle. After supper Mrs. Osler in a short speech presented Mrs. Taylor with a purse of money as a wedding present. Mr. and Mrs. Taylor thanked their many friends and gave them an invitation to visit them anytime.

Those who attended the Returned Men's Banquet and Dance in the Gleichen Odd Fellows Hall on Nov. 28th were: Mr. and Mrs. R. Shouldice, Mr. and Mrs. G. Rottle, Arrowwood and Mrs. J. Taylor, Mr. and Mrs. S. Sutor, Shouldice; Mr. and Mrs. W. Osler, Mr. and Mrs. J. Osler, Mr. and Mrs. S. Brown, Mr. and Mrs. G. Elder, Mrs. B. Brown, Mr. D. Brown, Mr. F. Ritchie and Mr. V. Symes Queenstown. They report a good time.

Mr. and Mrs. J. Taylor wish to thank all their friends for their kindness to them at the reception on Nov. 27.

United Church Notes

Weather and roads permitting, a Baptismal Service in the United Church on Sunday, Dec. 8th. Parents wishing to have their children baptized are requested to make arrangements to be present with their children on that date. It is also hoped that all Sunny School teachers as well as parents will be present at this service.

ARROWWOOD ITEMS

Be sure and look over the grocery specials of W. J. Schultz advert in this paper.

Mr. P. L. Fike was a business visitor to Blackie Wednesday returning home Thursday.

The Ladies' Aid of the Brethren Church will hold their annual supper and bazaar on Saturday, Dec. 7th.

Born—At Mrs. Lewendown's Nursing Home on Monday, Dec. 2nd, to Mr. and Mrs. S. Moss, a son.

Born—At Mrs. Lewendown's Nursing Home on Friday, Nov. 23rd, to Mr. and Mrs. E. Wanger of Milo, a daughter.

Born—At Mrs. Lewendown's Nursing Home on Saturday, Nov. 23rd, to Mr. and Mrs. Lawrence Phillips of Milo, a son.

The Boy Scouts want to collect all old toys in the district for the toy shop. If you have any please notify Teddy Weins.

The many friends of Chester Beagle are pleased to see him around again after his recent operation.

The W. A. of the United Church will meet at the home of Mrs. A. Phillips, Thursday afternoon, Dec. 12.

Mr. and Mrs. S. M. Burger left on Monday for an extended visit of several months in several directions going by way of Vancouver, wintering in California and returning by way of Chicago.

Mr. Frank Burger and family have returned to this vicinity after residing north-west of Edmonton for the past year. They have taken up residence east of town where they will operate his fathers farm, Mr. S. M. Burger.

Rev. Mr. Wilkinson accompanied by Rev. Mr. Little, had quite an accident when they were enroute to Arrowwood last Sunday. Near the Burne as they were coming up the hill, the auto left the road going down the steep embankment. The ministers had a bad scare, but were happy to escape uninjured. They were in Arrowwood. Gaylen Jones pulled the "tax" out of the ditch.

Bow Valley District Curling Competition

The Curling club is endeavoring to start with the co-operation of other clubs in the district, a Bow Valley District competition for single rinks. This competition would be operated on same plan as the Dominion playdowns for McDonald Brier in Toronto, and would include the towns of Strathmore, Gleichen, Arrowwood, Olney, Brooks and Bassano. Arrowwood and Strathmore have already responded as being in favor of the proposal and it is hoped that all curling clubs concerned will regard it in the same light. It is expected that a trophy and prizes will be offered for this competition—Bassano Mail.

Brethren Church Young People Notes

The Young People, of the Brethren Church, are planning regular Sunday evening services, beginning next Sunday evening, at 6:45.

There will be a mutual sharing of past, interesting experiences.

The Young People decided to take charge of the Sunday evening service every two months. Plans are also being made to edit a Young People's paper and to put on a play in the spring.

Young people of the community, you are cordially invited to meet with us in our socials, to be held every month and our regular Sunday evening meetings. Your interest, co-operation and help is needed to make these programs worthwhile.

Whip Behind, Mister

For some reason, one of the funniest sights in the world is man riding in a rumble seat. There is an uneasy hauteur about him as he bumps along, shut off from his friends and embarrassed by the world's public inspection, that touches a rare comic spot in the heart. He reminds us somehow of an unwilling figure on a float, needing only a fancy costume to make his misery complete.—The New Yorker.

Brethren Church Notes

Quite a large attendance greeted Rev. Mr. Lytle, of the Bible Society, at the union service on Sunday morning. The speaker spoke very effectively on the value of the Book. The audience was responsive, both in attention and in contributions for the furtherance of the work of the Society. Rev. Mr. Wilkison, United Church Pastor, was present and offered prayer.

On Sunday evening (Rev. J. H. Brubaker and daughters, Misses Ruth and Grace, were the main ones in leading the congregation in a very inspiring service. Miss Grace Brubaker lead in the song service and sang a solo. The sisters sang together also. Rev. Brubaker conducted the devotional part of the service. Miss Ruth was the speaker, bring a message of merit. Other special services are in prospect. There will be something different every Sunday night!

The young people held a very forward looking business meeting in the church basement on Monday evening. A number of constructive proposals were favorably acted upon. One of these was the decision to have a young people's meeting each Sunday evening, preceding the general service. They also decided to assume responsibility for the main service once every two months.

A general business session of a constructive nature was held on Tuesday evening. Various reports and recommendations were presented and acted upon. The Pastor will preach next Sunday morning on the value of the Commission.

Saturday evening, Dec. 14th, has been set as the date for the Ordinance Service. This service was to have been several weeks ago but was postponed because of the snow storm. Time of service, 7 p.m.

Floury Flour—the very "flour" of the world's best wheat—is always uniform and dependable—rich in nourishment and flavor—for cakes, pies, flaky pastry and bread. A strong flour that goes farther.

PURITAN FLOUR

Best for all your Baking

The Trade Agreement

About all that can be said at this juncture in support of the Canada-United States trade agreement signed at Washington on Friday, Nov. 15, is that it is a step in the right direction and should be a prelude to further concessions in the interests of a free flow of trade and commerce between two great neighboring and friendly countries.

Both the former Canadian administration and the newly-elected Dominion government are entering into the agreement with the substitution for their respective shares in the negotiations which culminated in a pact to promote greater commercial intercourse between two States, geographically and ethnologically designed for close relationships.

Indeed, however, as citizens of the Dominion are pronounced on the tangible benefits to be derived by the citizens of the Western Canadian prairie provinces as a result of the agreement, that is a verdict which must await results demonstrable after the pact has been in operation for awhile, and perhaps, for some considerable time.

This is a statement which cannot be emphasized too strongly. For it must be borne in mind that the benefits of a reciprocal commercial agreement cannot be reaped immediately the gates are flung open; nor can the maximum exchange be realized until the concessions have been granted, be realized in the earlier stages of the operations of an agreement.

There are good reasons for this. The amount of the duty reductions involved is by no means the only factor which determines the quantity and value of the goods exchanged between the co-operating signatories. There must be an available supply to meet a demand at the time the demand requires it. The demand must exist to take care of the supply. Trade practices and seasonal exigencies are contingencies which have to be reckoned with. New financial arrangements must be made when commodities are diverted into new channels of trade. Existing stocks may have to be liquidated. New methods of packing and shipping may be involved.

Then, too, it should also be pointed out that a number of the commodities on which duties have been reduced under the agreement are subject to quota restrictions and these will have some bearing in limiting the benefits to be derived.

There are only a few of the factors involved in the diversion of trade over new routes or in developing a trickle into a broad stream. There are others, and because of this, the Western Canadian producer must expect to wait awhile before he is able to reap enhanced prices for the products he expects to sell in a new market and, by the same token, the consumer does not hope to be able to purchase overnight goods imported under a newly signed agreement at a great deal less than the price he has been accustomed to pay.

Unquestionably one of the most important concessions to Western Canadian agriculture is the reduction of the duty on live cattle exported to the United States. This is one of the items, however, on which a quota restriction is placed. The lowering of the duty will provide a needed outlet for a considerable number of cattle but, on the other hand, many cattle raisers, who have been almost driven out of the business in the past two or three years on account of drought conditions, will not be in the position to take advantage of the new market for some time.

While Western Canadian producers will undoubtedly benefit by reduction of tariff on a number of commodities importable from the U.S.A., it should not necessarily be assumed that the benefit will be immediate on all articles covered by the agreement or even, in some cases, to the full extent of the reduction in duty. For example, it has already been announced by the radio dealers' association in Winnipeg that the lowered duty on radios will not result in reduction of price to the Canadian purchaser because radios sold in this country are made in Canada and are considerably cheaper than the American model plus duty.

These statements are not made with any intent to belittle the agreement, the efforts of the governments who have had a hand in the pact or the ultimate results which may ensue as a result of the insertion of the text of the wedge, but they do hope that the over-optimism as to immediate results will not result in disappointment.

No matter what the operation of this first agreement may bring in the way of benefits to Western Canadian producers, exporters and consumers of imports, and it is to be hoped, in the not far distant future. It might also well be pointed out that there are some indications that the operation of this pact may prove to be more beneficial to the more cautious commentators anticipate. The daily press reported that eastern Canadian manufacturers are apprehensive and, on the other side of the international boundary a number of interests, fearful of the effects of new Canadian imports, are planning to lodge vigorous protests at Washington. Straws show which way the wind is blowing.

This would indicate that the new agreement may be pitforked into the political arena in the United States and may be a causa belli in the next national elections that Canada, with what results remains to be seen. It is comforting to know that President Roosevelt has stated he believes the agreement will double the trade between the two countries within a couple of years and may reasonably be expected that he will defend his action rather than recede from the position he has taken.

A Foot-Conscious Country

The United Kingdom is the most foot-conscious country in the Old World and buys more shoes per foot than any other country, except the United States, according to organizers of the Shoe and Foot Congress at the Royal Agricultural Hall in London.

New Weather Predictor

Magnetometer Can Forecast Conditions Two Years Ahead

Buffy Maxwell, instructor in meteorology, who has been doing research work in a laboratory at Northwestern University, Evanston, Ill., has invented a "magnetometer" to aid him in his computations.

"You can predict the weather for two years in advance with the same ease that you might predict a storm for to-morrow," he asserted.

Last August, he said, he knew there would be a major storm in the northeastern United States in late November. In October he made 12 charts of the storm's course, and placed a blue print of the storm in the hands of navy weather men and his friends.

His new principle is based on the fact that the relative motions of the earth, moon and sun are irregular, resulting in a slight motion of the earth's whole mass. "That causes the atmosphere, which is like a fluid, to slosh back and forth over the earth, just as the water in a pan of a pan is jigged," he said.

Maxwell predicted little snow this winter and another drought next summer.

Fashions A Telescope

Western Ontario Student Makes Himself An Efficient Instrument

A few pieces of sheet metal, some bits of a broken windshield, and Randall Cole, of Clinton, University of Western Ontario student, can watch the rings gaily spinning about Saturn, or the moons on their never-ending trail around Jupiter.

For six months, he has needed his spare hours to working on odds and ends, and out of them, he fashioned, at no great expense, a telescope. Recently showed his creation to his astronomical professor, Dr. H. R. Kingston, who described it as one of the most successful telescopes for amateur purposes he has seen.

Mr. Cole made the lens out of a piece of broken windshield, grinding it himself. For the six-inch mirror, he invested in a piece of one-inch plate glass, but even in that case, he made it into a mirror himself.

Two pieces of sheet metal, rolled to resemble store pipe, formed the base of the telescope. About it he constructed his lenses and mirrors, his delicate instruments all of which were made out of wood, turned on his own lathe.

Royal Winter Fair

Alberta Is Heavy Winner In Cattle Class

Alberta came to fore at the Royal Winter Fair, where Charles Bull, of Calgary, exhibited the winner in the senior yearling division for bulls, Hereford beef cattle section. Exhibits of Royal Winter Fair, Alta., and Frank Collicutt, Crossfield, Alta., were second and third, respectively.

The Prince of Wales ranch of High River, Alta., with Epton Orator, was judged best in the bull, two years and under three class of the Shorthorn beef cattle section.

No Vaccination Marks

Just Swallow A Pill Is The New Method

The day when little Mary will vacillate herself by gulping down a pill was valued by Dr. Lloyd Arnold of the University of Illinois. The vaccination mark will thus be done away with, the medical college professor told bacteriologists at Indiana, Michigan and Ohio. The pill, he said, will contain vaccine, or dead bacteria.

In order that this stuff may not be destroyed by digestive fluids, science plays a trick on the stomach, administering a bile pill thirty minutes before the vaccination pill is taken, he said.

As a result, the stomach remains quiet for two or three hours, and the vaccine passes on unchanged to the small intestine, where it is slowly absorbed into the blood stream.

Sounds Like Good Advice

A farmer once asked the editor of a country paper for advice, as follows: "I have a horse that at times appears normal but at other times is lame to an alarming degree. What shall I do?"

The reply came: "The next time your horse appears normal, sell him."

A New Ship Elevator

Will Be Capable Of Handling Vessels Of 11,000 Tons

A ship elevator is being constructed near Rottensee, Germany, about eight and a half miles north of Madburg, where the Mittelnd canal crosses the River Elbe by a large aqueduct.

The difference between the level of the water of the canal and of the river varies from about 21 feet at high tide to nearly 56 feet at low.

This new elevator will resemble the famous ship elevator at Niederforn in so far that it will be able to accommodate ships of 11,000 tons, but otherwise represents a different type of construction.

While the Niederforn elevator rises 210 feet above the earth's surface, the new construction near Rottensee will be built deep in the ground. Instead of the water trough which carries the ships being borne up and down on wire-pulleys, here it will rest on two floats, each 30 to 56 feet, which are propelled by hydraulic pressure, and move up and down in shafts 210 feet deep.

The shafts, which have now been completed, stand over 150 feet apart and are each 33 feet thick with cast-iron interior walls, lined with concrete. Pillars 60 feet high carry the water through, and like the Niederforn elevator, the whole structure rests on an enormous concrete caisson.

Canadian Book Contest

\$2,000 To Be Awarded In Prizes For The Two Best Books

Announcement is made of a contest open to any Canadian citizen who is a resident of Canada (as of Sept. 16, 1935) and who feels they have the ability to write a fiction or non-fiction book in the English language of not less than 60,000 more than 125,000 words. The contest closes June 1st, 1936, and the winning books will be published within six months after the prize is awarded.

Eminent judges have been chosen for the contest as follows: Dr. Pelton Edgar, National President, The Canadian Authors' Association; Mr. S. Morgan-Powell, Assistant Editor-in-Chief, The Montreal Daily Star; Mr. C. R. Standerson, Deputy Chief Librarian, Toronto Public Library.

Application blanks for the contest and further details may be obtained from George J. McLeod, Limited, 266-268 King St. West, Toronto, Ontario. Secretary, The Canadian Authors' Association, P.O. Box 1424, Montreal, Quebec.

We hope that some of our readers will enter this contest, and wish them all success in their efforts.

Introduced By Canada

Women In Scotland Take To Wearing Of Raincoats

Canadians are generally accustomed to the wearing of rubbers as a protection in wet weather. In the British Isles rubber coverings for the feet are not so common, the general practice being to wear heavier soled boots and shoes.

This is particularly the case in Scotland. The women of Scotland are taking to the wearing of raincoats, or gaiters, introduced by Canada to the market in 1925. In place of the old Wellingtons, which are now being relegated to the country and for use by children. Canada supplies the major portion of the rubber footwear imported into Scotland, with Hong Kong occupying second place, according to the industrial department of the Canadian Railways. A part of the trade is supplied by domestic manufacturers.

In Primitive State

Says Indians Of James Bay Area Have Changed Little In Past Centuries

Despite three centuries of missionary and other contacts with the white race, one group of Canadian Indians to-day was reported much the same as it was 1,000 years ago.

Dr. Truman Michelson, Smithsonian Institution ethnologist, found last summer that the James Bay Indians in the northern part of Ontario have changed their language, customs, folklore and mythology little during the past eight or 10 centuries.

He said they probably are nearer than any other Indians to the type of primitive Algonquians who peopled eastern North America long before the white man arrived.

Famed River Drying Up

Many Ships Stranded On Sand Banks In Blue Danube

The famous Danube river is drying up—as a result of drought unprecedented for this time of year.

The Danube and Sava, which meet under the walls of Belgrade, are now lower than for more than 50 years. In many places people can wade across them.

All navigation on the Sava has been abandoned and many ships are stranded on sand banks. On the Danube only small vessels of less than four feet draught can pass.

River service between Belgrade and Vienna has stopped.

Willing To Help

Charles Phillips in his "Pade-rusk" tells a story of Lord Balfour. In 1917, Balfour was in Washington, and one evening at dinner he handed back the menu card to the Negro waiter and, placing a generous tip by his plate, said, "Just bring me a good meal." A very good meal was served, and the same thing happened several times.

On the last occasion the tip was trebled. "Thank you, sah," said the Negro, "if you done got any stah friend's wut can't read, you srah s'en 'em to mah."

A flannel cloth dipped in oatmeal makes a good cleaner for painted woodwork.

Rubber latex is successfully used for cement purposes.

Curious Old Laws

Smoking On Street Is Still Illegal In Britain

A recent freak court case at Hastings caused lawyers to search the statute books and remind Britons that curious laws remain un repealed and could send anyone to jail.

Still illegal in Britain are: Smoking a cigarette in the street. Sunday radio broadcasting.

Christmas dinner of more than three courses.

Making a mince pie "an abominable and idolatrous thing."

Playing billiards on a Sunday. It is possible, according to the old laws, for anyone to be jailed for inquiring another person to drink more liquor than would be good for him.

Held Meeting In Air

Believed to be the first business meeting ever held in the air the Blackpool Airport committee while returning from the sale of Man heard minutes read and concluded transaction of business just as their plane landed.

In a girl's name turning up sharply in retrospection: In a man's it's plain pug.

2 Things to Do TO EASE COLD INSTANTLY

Discomfort and Ache Go Almost Instantly This Way

1. Take two "Aspirin" Tablets. Make sure you get "Aspirin".

Instead of taking your system with strong medicines for a cold, try the way pictured above—the modern, easy way. Your own doctor will approve it. And it takes hold of even a bad cold almost immediately. The "Aspirin" you take will start combating your cold internally at once; if throat is sore, crush and stir. "Aspirin" Tablets in a third of an hour.

2. Drink a full glass of water. Repeat treatment in 3 hours.

of a glass of water; gargle twice. Do not miss mouth.

Aspirin Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

DEMAND AND GET

FLEMING'S FOLLY

—BY LAWRENCE A. HEATING

CHAPTER I.

Chill with promise of approaching winter, a low morning, sighing wind curled down from the snow peaked Grey Mountains twenty miles west to devil-dance with mistletoe given the wide main street of the town of Hawke.

Backboard teams and saddle horses lined the juniper bethel before Sam Pickett's general store, the false fronted Half Moon Saloon, and the three-story Trades Hotel across the street. With ears flapped and manes lowered between their knees, rumps, moustangs, and broke boddies together in morose resignation to the stinging and nip of dust-swirls that now and then all but hid them from view.

Through broad, busy windows of the hotel lobby could be seen the meeting of Boone County gentlemen, called by the owner of the modest Star Loop Ranch, Link Fleming. Every prairie-tanned countenance was etched in lines of gravity, every ear attuned to the earnest words of the twenty-three year old speaker in cowhide vest and work trousers who with sombrero tilted back and high forehead, faced the crowd from the elevation of a round-backed brown chair.

Passing, Link let his brown eyes set wide apart and flicked with grey, swept slowly, hopefully over the twenty-old men who waited in the absorbed interest. He lowered a snowy brow hand to his cartridge belt and shifted the heavy forty-five to a new position on his thigh. Clearing his throat, he held up a paper and continued:

"Reckon every one of you gets a message like mine. It says here Uncle Sam don't want us to graze the foothill ranges any more. The reason is, grass up there is thin and worn out, and never had the chance for a comeback. We've wiped these ranges almost clean, and now we need two or fifteen acres. When you started runnin' beef in this section, Beth Howland, what acreage did a steer use?"

At the sudden focus of attention on him, Howland, a lank, watery-eyed veteran of Texas trails, blinked startledly. He rolled the inevitable quid from one cheek to the other and hallowed again. Beth swallowed and shifted weight.

"Feed was plentiful," he answered.

meeting get out of hand so that he could not offer the plan for which he had summoned them here, Link sought some means of placating the men.

"A year ago we talked of ways of improving our range, making more money out of steers. I suggested a remedy which is even more important to us now. What we need is permanent relief."

"Irrigation, I suppose," sneered Hamilton. "You been cracked water, ever since yuh came here." He awaited slightly as he faced the crowd. "What's the use talkin' about a scheme that's never ever been tried? I say we got to fight for our rights or nobody'll even feel sorry for us."

"Who says it's never been tried?" Roper Kilgo spoke up good naturedly. "I'm for fightin' out, in case irrigation be a good thing. Especially when like Hoger you, here, we can't fight the whole U.S. Army."

"Let's hear what Link's got to say," he went on in a persuasive tone. "I never thought much about water in' dead land, but Fleming's talked it a long time, and I reckon he's gone through it through. Tell me he got soak Territory to draw plans for a scheme to irrigate the whole valley. I wish you gentlemen on whatever's decided, but this hoger means business, so we ought to look into the water question."

Link felt a thrill of relief as the words brought instant action. He had begun to fear from Roper's silence that he was falling him. No particular friends, this was one of the rare occasions when they found themselves working in harmony. Fleming had ridden to the Box 50 ranch to win this powerful support for his irrigation scheme.

"I've got to reconider, for he owned the largest herd of beef cattle in Boone County."

"Not yuh, Link," Roper had declared after the visitor uttered his purpose. "It do what I can't promise the boys think it over. They reject it, they'll back it, but I guess we'll all willin' to be shown."

This was indeed a concession, and it roused hope in the Star Loop owner. "That's all I ask," he grinned eagerly. "I'll help get the men in a regular meeting of mind. I'll explain to them why they reject it, we haven't lost anything. And if they go in for it this country will be a changed place."

Kilgo had studied his visitor shrewdly. "Then yuh don't think irrigation is just a crazy, newfangled idea."

"Not at all. I'll not only save us from ruin, but it will make every job in this prairie a breeze for you. Your place can benefit plenty."

"Well, I'm always open-minded to a good thing. I'll get yuh a hearin', Link. Reckon if Roper Kilgo says 'Boys, listen to this,' they'll listen. Eh?"

It was true enough. He was the most influential citizen of Boone County—and Link had come to suspect the real power behind local affairs. He was virtually county boss, a czar, jealous of his prestige and ruling with an iron fist. The man who dared interfere with or oppose Roper would meet a defeat.

There were whispered stories about a legend of certain persons he had marked with his wrath, and the series of misfortunes which came their way after that. More than one small-rancher finally had sold out for a pitiful sum, his acres and stores becoming part of the Box 50 while the man himself hurriedly shook Boone County down from his boots and never was heard of again.

Roper's influence defied analysis: it appeared to be a strange combination of brute force and personal magnetism. A number of ranchers constantly owed him sums of money, although the Stockmen's Bank existed to care for just such financial matters. Other men were indebted to him for various services, real or imagined. Still others gave blind allegiance as in all ages and in all climes the weak obey the strong. The Box 50 owner

was strong, he was powerful. With a round, black-checked head set on bull-like shoulders, he was as powerful physically as he was relentless when crossed, and determined on every project he undertook.

Still Holds Public Interest

News About Little Prince Of Kent Is Eagerly Read

The recently born Prince of Kent, who may some day sit upon the mighty throne of England, is being these days most successively with war news and what the Prince of Wales were.

The most minute details of how the baby son of the Duke and Duchess of Kent is progressing are discussed by the British public.

He is the fifth grandchild and the third grandson of the King and Queen, and will have the title of royal highness. Since 1917, this title has been confined to the issue of a British sovereign and to the issue of the sons of the sovereign.

The little Prince is related to half of Europe. In his veins flows royal German blood from his grandmother, who was a Princess of Teck, and from the King, grandson of Alberta the Good of Sax-Coburg-Gotha.

The royal baby is also related to Russian, Danish and Rumanian royalty.

A new coat of arms must be designed for the highborn baby. The College of Arms will design it, and it must be approved by the King.

Ex-Prisoner Makes Good
Years spent behind the grim walls of Ohio penitentiary showed Daniel Boggs, now only 31 years of age, the way to earn an honest future.

Since he was released from the penitentiary less than a year ago, through executive clemency, Boggs has built up an enviable advertising business and now has three offices.

During his sentence in the penitentiary Boggs studied advertising and became an advertising writer to earn money to provide financial aid to his aged mother and four sisters. They depended on him before he was "taken away."

He won the admiration of advertising men in Columbia, O., by his aptitude for copy-writing ability and while behind the walls he built a thriving mail order business.

Upon his release he was offered a job in Cincinnati at \$75 a week. He spent the offer and sent him here to establish his own concern.

Boggs is blazing a glorious trail along the "come-back" path and is a doctor to other business men who have proven quite successful.

Britain's Defence Plans
Country Obligated To Bring Forces Up For Safety

Britain proposes to spend one billion dollars in the next five years to build up the navy and the air force until they are the strongest in the world. Britain is to take no chances. She is not going to trust peace to the future.

If trouble comes, she is longer to be prepared for it. Might has again taken the place of right, and if preparedness for war can stop war, Britain is going to be ready to do the stopping.

This is a tragic situation to develop so soon after the great world war. Britain, however, is blamed for it.

She is a disarmament, but others are arming. She cut down her defence forces to a dangerous low level, as a doctor to other business men who have proven quite successful.

Under these circumstances, it is not to be wondered at that realists have taken the place of idealists in Britain's defence plans—Oswala Times.

Strange Body Structure
The Way To His Heart Is Through His Stomach

A boy whose heart is in the region of his stomach has been found in Soviet Russia. He is K. Otar, aged 10, and the strange structure of his body was revealed when he underwent a medical examination at Kutais. Apart from his peculiarity, the boy is normally developed and is a good scholar.

Has Reason To Object
Coin Miller mother objected strenuously to his collection of 28 live snakes. She said she observed every time she stepped over their slithering bodies going to get a jar of fruit in the cellar. Coin has boarded some of his snakes at a pet shop and keeps the rest in the cellar of his father's store at Hamilton, Ont.

Famous Printings For Rent

Anybody Trying To Foster Deeper Appreciation For Art

Hall bedrooms that never saw any better art than movie stars' pictures, will soon be blossoming out with colored reproductions of famous paintings. If Prof. Lester Longman's plans go through. The professor is head of the fine arts department of McMaster University, and he has the idea of renting out the colored pictures at 10 cents for two weeks.

"The 10 cents fee is really a guarantee of interest," the professor told The Herald. "It will mean that the students won't just drag the pictures home, put them aside and pay no more attention to them. I feel that the idea will be a sort of premium, and I think that a deeper appreciation of art will be fostered this way."

At present the pictures are on exhibition at the university. There are 75 now framed and ready to be rented. The collection contains pictures of the 17th and 18th century masters, as well as some modern cubist and impressionists. Among the older pictures are Gainsborough's "Portrait of Graham," Lawrence's "Master Lamington," and Gilbert Stuart's "Portrait of Washington."

There are no Canadian reproductions because the work of Canadian artists are not regarded in such proportions. There are English, French, Italian and one or two Spanish portraits.

The idea of renting pictures originated two years ago with a friend of Prof. Longman at Brown University in the United States.

According To Schoolboys
Examination In Science Produced Some Remarkable Answers

From schoolboys' science papers: The earth makes a revolution every 24 hours.

The difference between air and water is that air can be made wet, and water cannot be made air.

We are now the masters of steam and electricity.

Things that are equal to each other are equal to anything else.

Gravity is chiefly noticeable in the autumn, when the apples are falling from the trees.

The axis of the earth is an imaginary line on which the earth takes its daily rotation.

The word straight line is one which if produced to meet itself does not meet.

Electricity and lightning are of the same nature, the only difference being that lightning is often several miles long, while electricity is only a few inches.

He (after being turned down): "I'm not worrying; there's a lot more fish in the sea."

She: "Yes, and if nobody's got a better line than you have they'll all after there."

Mother's Guide to Better CONTROL of COLDS

For Fewer Colds...
Vicks Vapo-r-nol helps
Prevent many colds

At the first warning of nasal irritation, quick—a few drops of Vicks Vapo-r-nol—excellent. Especially designed for nose and throat, where colds start. Vapo-r-nol helps prevent many colds—and to throw off head colds in their early stages.

For Shorter Colds...
Vicks Vapo-r-nol helps
End a Cold sooner

If a cold has already developed, use Vicks Vapo-r-nol, the mother's standby in freckle-busted children. Rub it on at bedtime, its combined poultice-vapor action loosens phlegm, soothes irritation, breaks congestion. Often by morning the worst of the cold is over.

Follow Vicks Plan for Better Control of Colds
A helpful guide to fewer colds and shorter colds. Developed by Vicks Chemical and Medical Staff tested in extensive clinical by practicing physicians—further proved in everyday home use by millions. The Plan is fully explained in each Vicks package.

VICKS PLAN FOR BETTER CONTROL OF COLDS

Little Helps For This Week

Then I said, I have labored in vain, I have spent my strength for naught. Isaiah 59:4.

Because I have spent the strength Thou gavest me. In struggle which Thou never didst ordain. And have but drags of life to offer Thee.

O Lord I do repent

It is the best work that God wants, not the drag of our exhaustion. If the people about us are carrying on their business or their benevolence at a pace which drains the life out of you, resistably take a slower pace, be called a laggard, make less money, accomplish less work than they, but be what you want to be and can be. Every person has their natural limit of power as much as an engine, ten horse power, or twenty, or a hundred.

Accustom yourself to do whatever you have to do with tranquility that you may have peace.

WORRIED ABOUT YOUR HEALTH?

TAKE SASKASAL

Nature gives to Canada in munificent abundance the natural Mineral Salts found in Little Manistow. These medicinal salts are refined and prepared by expert Chemists in the form of SASKASAL.

Take SASKASAL, in turn gives to Canadians a simple form—easy and pleasant to take—the cleaning, purifying, medicinal properties of Nature. Take the simplicity of SASKASAL. Salts, so helpful to you in regaining your health and making life in joyous vigor. If you suffer from Constipation, Indigestion, Rheumatism, mild Kidney or Liver trouble, take SASKASAL. Salts. At All Drug Stores—60c to 10c

Raising Gigantic Tons

To Be Up To Curb Increase Of White Grub

An "army" of gigantic tons is being mobilized at the Meringa space experimental station in North Queensland, Australia. In due course, they will be flung into action against a certain kind of crop-destroying white grub. Originally, 1000 of these tons were imported from Hawaii.

Now there are 2,000 of them and the number is increasing rapidly. It is said to be the first time that such creatures have been in captivity.

Cause For Laughter

The mechanical lesson was in progress at the university, and the professor was demonstrating a piece of apparatus. "This will have noticed," he shouted, "that this machine is operated by a crank." Then he wondered why the students laughed.

Story With A Moral

The following where a moral
is shown is taken from an
exchange.

"Recently a church congre-
gation in a little Kansas town
built a new church. To pay
for it they were obliged to call
on the merchants of the com-
munity for donations. The
merchants responded liberally
and \$3.00 was raised from that
source. The last man asked to
subscribe was John Smith, a
merchant. 'I will give you \$20
if you will allow me to add
something to the list,' he said.
The permission was granted
and he wrote at the foot of the
list:

John Smith \$20.00
Mail order house \$60.00
Peddler and transient
trader \$60.00

"The church people saw the
point when the minister read
from the pulpit a list of the
donors to the building fund,
and since the dedication of the
church there have been no
more mail orders sent out from
that town."--Exchange

A Canadian Abroad

Up to the busy news-stand
on the corner of 47th Street and
Broadway stepped a customer
the other afternoon. The said
customer was wearing a mack-
inaw, corduroy trousers and
high boots. He selected a news-
paper, handed the boy a coin
accepted some change, and

turned away.

The newsboy took a closer
look at the coin and let out a
yell."Hey wait a minute, mister,"
he shouted. "This is a Can-
adian dime you gave me."The customer shrugged.
"Well," was the reply, "I'm a
Canadian!... N.Y. Mirror."Skating Schedule
